

# Satellite Clubs

Satellite clubs are extensions, or outposts of community sports clubs which are established in a new venue, usually a secondary school, college or community centre, and specifically target the 11-25 age group.

Satellite clubs make it easier for young people to stay in sport, or to start playing sport for the first time. They provide a stepping stone to a community club or regular participation through the creation of relevant, appealing and convenient sporting opportunities for young people.

... new players from different ethnic backgrounds - delivering structured after school sessions

... We have continued to engage with the local young people ... have been able to provide an environment that allows for the young people to integrate with one another

... taken them off the streets, given them a purpose and an opportunity to try our sport

We believe that offering activities such as table tennis within the Youth Club settings creates a diversion activity for the local young people, many who we believe are at risk of becoming involved in negative life behaviours and choices

One of the young lads who was in a care home didn't go to school - very reluctant with foster people (5 foster homes) his friend was playing so he came down with them and now this lad has gone back to school - and he comes every single week - and this just wouldn't have happened without this funding for the project
